

## The Drugs of To-day

New remedies are coming into use rapidly these days. Each new drug presents problems for the pharmacist.

The druggist who gives proper prescription service must not only have what the physicians are prescribing, but must be familiar with the nature of each new drug and the relation it bears to other drugs.

Our stock and our information is kept up to the times. We make a specialty of prescription work and can promise service of the most scientific character.

No matter what physician writes your prescription, we can fill it.

**"Edison Gas Systems"**  
Keep up with the age.  
Edison Gas is cheaper than electricity.

You do not have to buy new machinery every few months, or even help to pay for it.

Remember, we furnish stoves for residences; also ovens for baking and roasting.

Just think—light, heat, cooking—all in one plant, and you own it.

Barber shops, saloons, heat water; restaurants cook, drug stores heat chemicals, laundries heat rolls and hardware stores heat soldering irons and have light at the same time.

Be not deceived—this is not new. Hundreds of testimonials where there is electric lighting plants, (no would be), and natural gas. But Edison Systems beats them all. Why?

Because it is cheaper and better lights. Insurance companies accept the risk. Just the same rate as electric lights. And no crossing of live wires to burn your house when you are asleep. Call on or address J. D. Raudebaugh, Agent.
